

Security Council

Distr.: General
6 February 2015

Original: English

Security Council Committee established pursuant to resolution 1540 (2004)

Note verbale dated 29 January 2015 from the Permanent Mission of Cabo Verde to the United Nations addressed to the Chair of the Committee

The Permanent Mission of the Republic of Cabo Verde to the United Nations presents its compliments to the Chair of the Security Council Committee established pursuant to resolution 1540 (2004) and has the honour to submit herewith its first national report on the implementation of the above-mentioned resolution (see annex).

Annex to the note verbale dated 29 January 2015 from the Permanent Mission of Cabo Verde to the United Nations addressed to the Chair of the Committee

Report of the Republic of Cabo Verde on its implementation of Security Council resolution 1540 (2004)

Introduction

The Republic of Cabo Verde is often praised as an example among countries for its political stability, good governance and developmental growth, despite its lack of natural resources. It is a multiparty parliamentary democracy in which the constitutional powers are shared between the elected Head of State (the President of the Republic), the executive power (the Government) and the parliament (the National Assembly).

The legal system, based on the Constitution adopted in September 1992 and its subsequent revisions, promotes democratic values and guarantees the separation of powers. National laws provide for an independent judiciary, and the Government generally respects this provision in practice.

The Constitution and national laws provide for freedom of speech and of the press, and the Government generally respects these rights. The independent media are active and express a variety of views without direct restriction.

With regard to security issues, Cabo Verde, like other countries in the region, faces the challenges of drugs and arms trafficking, illegal migration, piracy, organized crime and terrorism. These illicit activities often affect the economy and social development of the country, while money-laundering has contributed to a construction and real estate boom. Controlling an extensive maritime exclusive economic zone (nearly 800,000 km²) is a major challenge facing Cabo Verde that stems from its proximity to the Sahel region.

However, as far as peace is concerned, the challenges of Cabo Verde are much smaller than those of other countries in the region, where terrorism is possibly associated with Islamic fundamentalism.

Pursuant to Security Council resolution 1540 (2004), the Ministry of External Relations, through the Permanent Mission of Cabo Verde to the United Nations, presents to the Security Council Committee established pursuant to resolution 1540 (2004) the first report of the Government of Cabo Verde on steps it has taken or intends to take to implement resolution 1540 (2004).

Paragraph 1

Cabo Verde does not possess nuclear, chemical or biological weapons, or their means of delivery, and is committed to disarmament and the non-proliferation of such weapons nationally, regionally and globally.

The Government of Cabo Verde does not provide any support to non-State actors attempting to develop, acquire, manufacture, possess, transport, transfer or use nuclear, chemical or biological weapons or their means of delivery.

In support of these non-proliferation objectives, Cabo Verde is party to the following multilateral arms control and non-proliferation treaties and conventions, which, according to the Constitution, are part of domestic national law and related arrangements:

- Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
- Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare
- Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction
- Treaty on the Non-Proliferation of Nuclear Weapons
- Comprehensive Nuclear-Test-Ban Treaty
- Treaty Banning Nuclear Weapon Tests in the Atmosphere, in Outer Space and Under Water
- African Nuclear-Weapon-Free Zone Treaty

Cabo Verde is also party to 12 of 19 international conventions and protocols on counter-terrorism, those below in particular having requirements contributing to the prohibition of proliferation-related activities and the use of nuclear, chemical and biological weapons, which are also relevant to the implementation of resolution 1540 (2004):

- Convention on the Physical Protection of Nuclear Material
- International Convention for the Suppression of Terrorist Bombings
- International Convention for the Suppression of the Financing of Terrorism

Cabo Verde has signed, but not yet ratified, the Amendment to the Convention on the Physical Protection of Nuclear Material and is a partner nation in the Global Initiative to Combat Nuclear Terrorism. Its application for membership in the International Atomic Energy Agency (IAEA) has been accepted but awaits further decision-making.

Additionally, Cabo Verde has subscribed to the International Code of Conduct against Ballistic Missile Proliferation.

Paragraph 2

In accordance with article 12, paragraph 4, of the Constitution of Cabo Verde, the rules and principles of general international law or common law and international conventions that have been validly approved or ratified take precedence, after their entry into force in international law and domestically, over all legislative and regulatory acts of domestic origin. This means that the treaties and conventions to which Cabo Verde is party, as listed above, have become part of national domestic law.

Law No. 31/VIII/2013 is a major piece of legislation that gives effect to the main multilateral non-proliferation treaties and conventions and to resolution 1540 (2004). The law deals with all types of armaments, including biological, chemical and radiological weapons and nuclear explosive devices, as noted in article 3 and annex I of the law. Particular requirements of resolution 1540 (2004), stated in

paragraphs 2, 3 and 8 (d), are further addressed in chapter X, particularly in the following articles:

- Article 90 (on prohibitions and penalties, of relevance to paragraph 2, and on measures regarding storage and export, of relevance to paragraph 3)
- Articles 91, 93 and 94 (on brokering and penalties, of relevance to paragraph 3)
- Article 92 (on illicit trafficking and penalties, including for the import, export, transit, trans-shipment and transport from or through the national territories of the Economic Community of West African States (ECOWAS) and other States party to arms conventions ratified by Cabo Verde)
- Article 100 (on the penalties related to articles 90, 91 and 92 when the non-State actor is a company or industry, of relevance to paragraphs 2, 3 and 8 (d))

In January 2013, Law No. 27/VIII/2013, on anti-terrorism, was adopted. Among its provisions that can contribute to the implementation of resolution 1540 (2004) are those prohibiting terrorism and its financing.

Additionally, Cabo Verde has Law No. 28/VII/2009, on countering money-laundering, in which it proposed the establishment of a financial intelligence unit. Cabo Verde set up such a unit through Law No. 12/IX/2012, which has provisions for reporting and investigating suspicious financial transactions. The central bank had been taking the lead on countering money-laundering and related financial crimes, but in 2012 this was revised so as to have the financial intelligence unit take on the role previously held by the central bank and have it become an independent governmental entity, although located within the Ministry of Justice. In September 2013, Cabo Verde applied to become a member of the Egmont Group of Financial Intelligence Units.

The 2009 law on countering money-laundering is due to be amended in 2015 to take into account new Financial Action Task Force recommendations that contribute to non-proliferation. The new law will thus be an improved contribution to the implementation of resolution 1540 (2004) in this financial area.

The International Monetary Fund conducted an evaluation in 2007 through the Intergovernmental Action Group against Money Laundering in West Africa, to provide a baseline measure of the financial, legislative and related operational capabilities of Cabo Verde (available at www.giaba.org/reports/mutual-evaluation/Cabo%20Verde.html). The next evaluation (second round) is scheduled to start in 2016 and is expected to take into account legislative and operational developments since 2007, including those mentioned above.

In addition to the entities of the National Security Council and the Government responsible for implementing the above-mentioned legislation, Cabo Verde has national crisis management processes that might also be used in the event of a national security incident or crisis related to the concerns of resolution 1540 (2004). For example, a multi-ministerial crisis commission was set up in November 2014 to manage the devastating consequences of volcanic activity on the island of Fogo, which led to the subsequent relocation of residents and related disaster management. Such commissions are led by the Ministry of the Interior and receive contributions from, inter alia, the Civil Protection Service, the Red Cross, mayors (presidents of municipalities) and the Ministry of Defence.

Paragraph 3

The national authority of Cabo Verde that deals with chemical security measures and the implementation of the Chemical Weapons Convention is situated within the Ministry of External Relations.

Cabo Verde has customs registration procedures and licenses entities to import, handle and store poisons and medicines. Law No. 59/2006 deals with import and export control and the licensing of medicines and Legislative Decree No. 34/2007 and accompanying regulation 32/2007 regulates pharmacies. This legislation is in line with the technical standards and norms of European Union legislation, and Cabo Verde is working in partnership with the European Union to make improvements.

The following legislation and regulations related to safety, security, public health and the environment contribute to the implementation of paragraph 3 of resolution 1540 (2004):

- Ministerial Decree 1-F91 of 25 January 1991, which establishes norms and procedures to be followed by industrial enterprises with regard to the storage, transport, treatment, use and disposal of biological, chemical and toxic products.
- The Rotterdam Convention on Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (ratified on 1 March 2006).
- Legislative Decree No. 26/1997 of 20 March 1997, concerning the import, commercial trade and use of toxins and chemicals, as well as phytosanitary issues.
- An IAEA safeguards agreement, in line with its obligations under the Treaty on the Non-Proliferation of Nuclear Weapons and the additional protocol, both signed by Cabo Verde on 28 June 2005 (not yet in force).
- The International Health Regulations (2005), to which Cabo Verde is party, complements the implementation of resolution 1540 (2004). Steps taken by Cabo Verde to implement the International Health Regulations include the placement of a health safety official/office at each main sea and airport in the country to address biological, chemical and radioactive materials of concern in cargos that might cause security and public health crises.
- Customs Legislative Decree No. 4/2010 of 3 June 2010, which addresses import, export, transit and trans-shipment issues relevant to the implementation of resolution 1540 (2004). Cabo Verde works within ECOWAS on customs cooperation and coordination. In 2015, a new common customs tariff will be implemented by all members of ECOWAS.
- In support of work at the borders, customs offices make use of the Automated System for Customs Data. This is useful in profiling items for risk assessment, including that of commodities and items associated with resolution 1540 (2004). For example, the Harmonized Commodity Description and Coding System can be used in the Automated System for early identification of the more commonly traded chemical precursors associated with the Chemical Weapons Convention. Such profiling and assessment processes are multi-purpose in Cabo Verde customs, as they are also used to deal with items and goods of concern arising from other conventions such as the Convention on Psychotropic Substances and the Rotterdam Convention.

Paragraph 7

Request for assistance:

In a manner similar to its Law No. 31/VIII/2013, which harmonizes controls on all armaments, including biological, chemical and nuclear weapons, Cabo Verde is interested in harmonizing its legislation or regulations on the pharmacy sector. For example, it is interested in learning more about existing control lists, such as the list of dual-use items contained in European Union Regulation (EU) No. 388/2012 amending Council Regulation (EC) No. 428/2009 setting up a Community regime for the control of exports, transfer, brokering and transfer of dual-use items.

Workshops and seminars on issues addressed by resolution 1540 (2004) should be organized in Cabo Verde, with technical support from the United Nations, to raise awareness among public servants, as well as in the high schools and universities.

Point of contact

Cabo Verde provides the following information on the point of contact for communication with the Committee:

Joaquim Lopes Maia, Jr.
Minister Plenipotentiary
Telephone: +002382607887
E-mail: Joaquim.Maia@mirex.gov.cv

Address:

Ministry of External Relations,
National Directorate of External Politics and Cooperation
BP No. 60, Palácio das Comunidades
Praia, ASA

Experience and lessons learned

In its resolution 1977 (2011) the Security Council promoted the sharing of experience, lessons learned and effective practices in the implementation of resolution 1540 (2004). As national reports are posted on the Committee website, other countries have the opportunity to read them and perhaps adapt the information contained in them to their own national circumstances so to facilitate their implementation of resolution 1540 (2004).

Relevant experiences might include:

- The use of existing senior-level interministerial/multi-departmental committees and processes to deal with national security crises (the commissions and processes for crises established in Cabo Verde might serve as examples of the possibilities for such uses should a threat or incident related to resolution 1540 (2004) arise)
- The benefits of harmonized legislation such as Law No. 31/VIII/2013

Enclosure

Matrix of Cabo Verde

The information in the matrices submitted by States originates primarily from national reports and is complemented by official government information, including that made available to intergovernmental organizations. The matrices are prepared under the direction of the Security Council Committee established pursuant to resolution 1540 (2004).

The Committee intends to use the matrices as a reference tool for facilitating technical assistance and to enable it to continue to enhance its dialogue with States on their implementation of resolution 1540 (2004).

The matrices are not a tool for measuring compliance of States with their non-proliferation obligations but for facilitating the implementation of Security Council resolutions 1673 (2006), 1810 (2008), 1977 (2011) and 1540 (2004). They do not reflect or prejudice any ongoing discussions outside of the Committee, in the Council or any of its organs, of a State's compliance with its non-proliferation obligations or any other obligations. Information on voluntary commitments is for reporting purposes only and does not in any way constitute a legal obligation arising from resolution 1540 (2004) or successive resolutions.

Paragraph 1 and related matters from paragraphs 5, 6, 8 (a), (b) and (c) and 10
